ZanHotel–Ajira Portal Project Proposal

PROJECT TITLE

ZanHotel–Ajira Portal: A Digital Job Matching and Employment Management Platform for the Hospitality Sector

1. INTRODUCTION AND BACKGROUND

Background Information

The hospitality and tourism sector is a major contributor to employment and economic development in Zanzibar and Tanzania. However, recruitment processes remain manual, informal, and inefficient.

Introduction

This project proposes the ZanHotel–Ajira Portal, a digital platform connecting hotels with job seekers through a centralized online system.

2. BRIEF PROBLEM STATEMENT

There is no centralized platform for hotel job listings. Hotels rely on informal methods such as friends, staff, and social media. Manual applications are inefficient and difficult to track.

3. STATE OF THE ART AND MOTIVATION

Existing job portals are generic and not tailored to hospitality recruitment needs, creating the need for a specialized platform.

4. GENERAL AND SPECIFIC OBJECTIVES

General Objective:

To develop a centralized digital employment platform for the hospitality sector.

Specific Objectives:

- Analyze existing recruitment practices

- Design secure system architecture

- Develop job posting and application modules

- Implement admin monitoring tools

5. PROPOSED SOLUTION

A secure web-based platform with dashboards for hotels, job seekers, and administrators.

6. SCOPE

Included:

- Hotel registration, job posting, admin management.
- Job seeker registration, job viewing, job application, complaints module, job seeker dashboard

Excluded:

Payroll processing and automated interviews.

7. ANTICIPATED ARTIFACTS

- System documentation.
- Diagrams.
- web application.
- testing reports.

8. RESOURCE REQUIREMENTS

Software:

- Django.
- ReactJS.
- PostgreSQL
- JWT.

Hardware:

- Computer.
- Internet.
- cloud server.

9. EXPECTED CONTRIBUTION

Improved employment access, transparency, and recruitment efficiency.

10. PROJECT SCHEDULING

Week 1–3: Proposal writing and approval

Week 4–8: System analysis and requirements

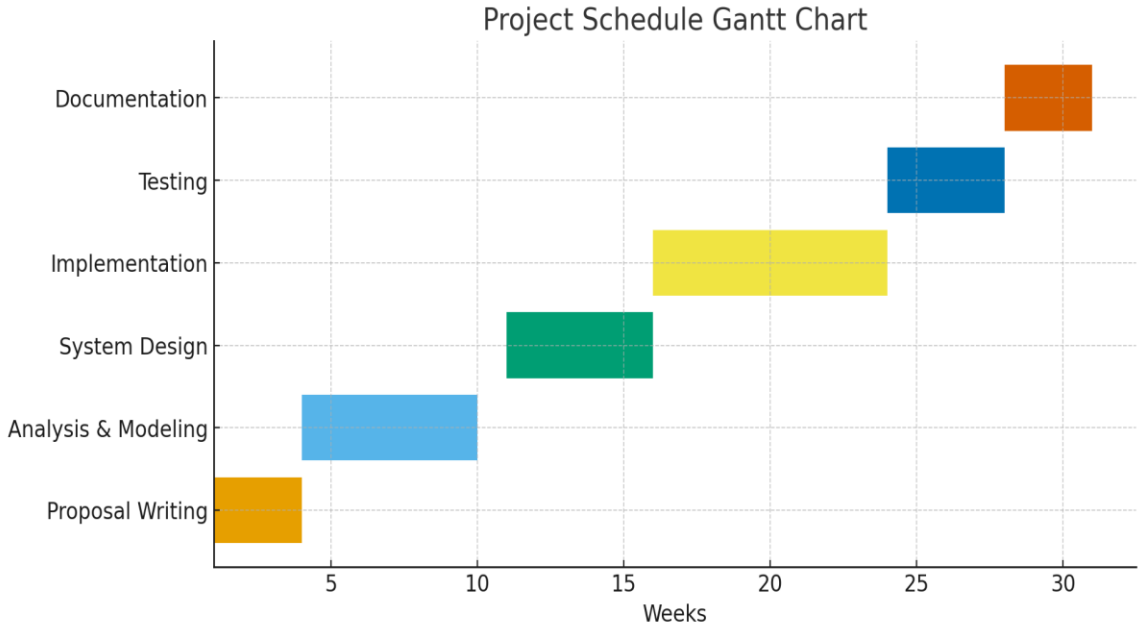
Week 9–13: System design and database modeling

Week 14–22: System implementation and development

Week 23–25: Testing and debugging

Week 26–28: Documentation and deployment

Week 29–31: Final review and project defense



11. FINANCIAL IMPLICATIONS

Development Tools (INTERNET): Tsh 35,000

Miscellaneous: Tsh 50,000

Total Estimated Cost: Tsh 85,000
